

McGladrey Audit Performance System

The McGladrey Audit Performance System (MAPS) is the most efficient audit assessment tool available to CPA firms today. MAPS is powered by CaseWare, the premier international provider of assurance, reporting and analysis tools.

Key advantages of MAPS include:

- A proven A&A system built by McGladrey & Pullen, a nationally recognized firm, ensuring continued efficiencies for our practice and yours.
 - Our smart audit intelligence guides your auditors through the risk assessment process and results in a concise and yet effective audit approach.
 - The McGladrey & Pullen risk-based approach increases realization through a reduction in program steps and sample sizes.
 - Ongoing training available through our Learning Management System provides assistance in onboarding of new talent and continued development of your existing team.
 - Real time review benefits, such as synchronization, provide increased realization through time minimization.
- 
- An integrated tax provision feature allowing tax professionals to complete their tax workpapers more efficiently in conjunction with the audit engagement team.
 - Research and support manuals that are updated automatically, as often as daily.

Advance your firm with an intelligent performance system.
